

## U.S. Healthcare

Dion Durrell offers U.S. healthcare organizations a full range of consulting services for self-insured professional liability programs and other self-insured coverages. As these programs can be costly, clients choose Dion Durrell for the hallmarks of our service: superior communication of results; strategic input into decision-making; and unbiased professional guidance. Our services to self-insurance programs include:

- Actuarial valuations of self-insurance programs
- Development of strategic funding and accounting policies
- Excess insurance evaluation
- Cost allocation to corporate sub-entities, physicians and/or departments
- Benchmarking of costs against peers
- Asset / liability analyses and financial statement pro-forma projections
- Cash flow analyses and investment policy

We also have a track record of helping U.S. healthcare organizations design, implement, and manage captive insurance companies and optimize their strategic value. Our services to captives include:

- Captive feasibility analyses
- Captive implementation and business planning
- Asset / liability analysis and financial statement pro-forma projections
- Reserve certifications and statements of opinion
- Budgeting and premium setting

In all we do, Dion Durrell thinks 'beyond the numbers' and provides consulting assistance in related insurance and risk financing areas such as:

- Loss control improvement plans
- Owner controlled insurance programs
- Physician / hospital joint programs
